**AN ACT  
REQUIRING CRITICAL INFORMATION INFRASTRUCTURE INSTITUTIONS  
TO ADOPT AND IMPLEMENT ADEQUATE MEASURES TO PROTECT THEIR  
INFORMATION AND COMMUNICATIONS TECHNOLOGY (ICT) SYSTEMS  
AND INFRASTRUCTURE**

EXPLANATORY NOTE

The COVID-19 pandemic accelerated the country's digital transformation and digital economy. Filipinos now use 4.3 more new digital services on average compared to pre-pandemic years.<sup>1</sup> E-commerce grew significantly, and sales are expected to be valued at US\$10.3 billion by 2025.<sup>2</sup> The Bangko Sentral ng Pilipinas reported that 53% of adult Filipinos had electronic money accounts in 2021, up from 29% in 2019.<sup>3</sup> According to the World Bank's assessment, online education and remote work are here to stay.<sup>4</sup>

Increased use of digital technologies, especially the Internet, is accompanied by cyberthreats and risks. Malicious actors—from casual scammers to highly sophisticated state-backed groups—hunt for vulnerabilities in ICT systems and networks to steal information, disrupt essential services, and profit from attacks. Hence, it is critically important to ensure that the Philippines has a national policy framework for the protection of digital assets, especially critical information infrastructure (CII), against threats that could paralyze our economy and affect the wellbeing of Filipinos.

The Philippine National Cyber Security Plan 2022 highlighted the goal of “assuring the continuous operation of the nation’s critical information infrastructure.” These digital systems underpin the operation of critical infrastructure, such as water, electricity, banking and financial networks, telecommunications, and other networks vital to the operation of the country.

In light of these risks, it is high time to ensure the protection of CIIs by ensuring, at the minimum, compliance with international standards and globally accepted best practices for cybersecurity.

As a proactive and institutionally cohesive response, this bill aims to protect the cybersecurity of CII by requiring the: (i) adoption of minimum information security standards, (ii) creation of a computer emergency response team and reporting of cybersecurity incidents, and (iii) development of a capable pool of cybersecurity professionals and practitioners that will be critical to the effective implementation of cybersecurity policy, rules, and standards.

If passed, the Critical Information Infrastructure Protection Act will provide a framework for ensuring the security and reliability of the country’s digital ecosystem, which is crucial to the country’s continued digitalization and growing digital economy.

As a necessary step to improving Philippine cybersecurity, the passage of this bill is earnestly sought for the security and well-being of all Filipinos.

GRACE POE

SENATE  
S. No. 863

'22 JUL 25 P2:14

RECEIVED BY

Introduced by Senator Grace Poe

**AN ACT  
REQUIRING CRITICAL INFORMATION INFRASTRUCTURE INSTITUTIONS  
TO ADOPT AND IMPLEMENT ADEQUATE MEASURES TO PROTECT THEIR  
INFORMATION AND COMMUNICATIONS TECHNOLOGY (ICT) SYSTEMS  
AND INFRASTRUCTURE**

*Be it enacted by the Senate and House of Representatives of the Philippines in  
Congress assembled.*

1 Section 1. Title. – This Act shall be known as the "*Critical Information*  
2 *Infrastructure Protection Act of 2022.*"

3 Sec. 2. Declaration of Policy. – The growth of information computer  
4 technology is accompanied by new and serious threats and, as such, the state  
5 recognizes as vitally important the establishment of a more secure cyberspace and a  
6 data protection regime that is compliant with international standards and ensures  
7 the free flow of information.

8 It is the policy of the State to protect Critical Information Infrastructure  
9 ("CII") from cyberattacks and threats, data manipulation, cybercrimes, and activities  
10 of malicious actors. The State recognizes that the protection of computers,  
11 networks, electronic devices, and digital assets, including information, is a common  
12 objective and requires the combined efforts of the public and private sectors, and  
13 cooperation with local and international actors, in order to minimize the impact of, if  
14 not prevent, cyberattacks, threats, and risks on the nation's security and socio-  
15 economic well-being.

16 Further, the adoption and implementation of minimum information security  
17 standards is a globally accepted best practice to provide guidance, which would lead  
18 to more efficient use of resources, improved risk management, consistent delivery of

1 critical and essential services, and effective protection of the confidentiality,  
2 integrity, and availability of information that is vital to the nation.

3 Sec. 3. Definition. – For the purpose of this Act and for the implementation of  
4 the policy contained herein, the following definitions shall apply:

5 a. "Critical infrastructure" refers to assets, systems, and networks, whether  
6 physical or virtual, that are considered so vital that their destruction or  
7 disruption would have a debilitating impact on national security, health  
8 and safety, or economic well-being of citizens, or any combination thereof.

9 b. "Critical Information Infrastructure (CII)" refers to computer systems, ICT  
10 information and communications technology (ICT) networks, and digital  
11 assets that are necessary for the continuous operation and delivery of the  
12 country's critical infrastructure services.

13 c. "CII institution" refers to a government agency or a private company that  
14 owns, operates, controls, and/or maintains critical information  
15 infrastructure, and whose operation is nationwide in scope and/or covers  
16 metropolitan centers, including Metro Manila, Metro Cebu, Metro Davao,  
17 and, by 2025, Metro Cagayan de Oro, or as defined and updated by the  
18 National Economic Development Authority (NEDA) or the Philippine  
19 Statistics Authority (PSA).

20 d. "Computer Emergency Response Team" or "CERT" refers to an  
21 organization that studies computer and network security in order to  
22 provide incident response services to victims of attacks, publish alerts  
23 concerning vulnerabilities and threats, and to offer other information to  
24 help improve computer and network security.

25 e. "Information security" refers to the preservation of the confidentiality,  
26 integrity, and availability of information. This may also involve other  
27 properties, such as authenticity, accountability, non-repudiation, and  
28 reliability of information.

29 f. "Information security incident" refers to an occurrence that actually or  
30 potentially jeopardizes the confidentiality, integrity, or availability of an  
31 information system or the information the system processes, stores, or

1 transmits or that constitutes a violation or imminent threat of violation of  
2 security policies, security procedures, or acceptable use policies.

3 g. "Information system" refers to applications, services, information  
4 technology assets, or any component handling information.

5 Sec. 4. Coverage of Critical Information Infrastructure. – This Act covers CII,  
6 whether in the public or private sector, in industries including, but not limited to:

- 7 a. Banking and finance;
- 8 b. Broadcast media;
- 9 c. Emergency services and disaster response;
- 10 d. Energy;
- 11 e. Health;
- 12 f. Telecommunications;
- 13 g. Transportation (land, sea, air); and
- 14 h. Water.

15 An entity, whether public or private, that owns, operates, and maintains CII in  
16 the industries mentioned above, and as updated by the Department of Information  
17 and Communications Technology (DICT), shall be covered by this Act.

18 The DICT shall institute a consultation process to update the definition of a  
19 CII, the list of CII institutions, and the sector or industry covered as CII every three  
20 (3) years from the effectivity of this Act.

21 Sec. 5. Adoption of Minimum Information Security Standards. – All covered  
22 CII institutions shall adopt and implement adequate measures to protect their ICT  
23 systems and infrastructure, and respond to and recover from any information  
24 security incident, in compliance with existing laws, rules and regulations.

25 They shall be required to:

- 26 a. adopt the Code of Practice stipulated in the Philippine National Standard  
27 (PNS) on *ISO/IEC 27001 Information Security Management System (ISMS)*  
28 *(series of standards)* and PNS *ISO 22301 Security and resilience –*  
29 *Business continuity management systems (BCMS)*. They shall also adopt  
30 the *ISO/IEC 27701 Privacy Information Management Systems*, as  
31 applicable;

- 1           b. submit to the DICT a copy of their formal certification as proof of adoption  
2           of the PNS ISO/IEC 27000 (series of standards), PNS ISO 22301, and  
3           ISO/IEC 27701, as applicable; and  
4           c. ensure that their certificates are up-to-date and shall submit the latest  
5           annual audit confirmation to the DICT.

6           In lieu of the submission of formal certification above, covered CII institutions  
7 shall subject themselves to an annual information security self-assessment using  
8 standards, such as but not limited to, the Center for Internet Security (CIS) Controls  
9 or the National Institute of Standards and Technology (NIST) Special Publication  
10 (SP) 800-53, during the first quarter of each year. The concerned institution shall  
11 submit this self-declaration and attest to its validity to the DICT on or before the 31<sup>st</sup>  
12 of March. The self-declaration shall be signed off by the respective head of the  
13 department directly in charge of the agency's information security systems.

14           Each CII institution shall adopt programs, guidelines, and written procedures  
15 for the implementation of its chosen information security standard, which shall be  
16 included in their annual submission.

17           The DICT shall have the authority to determine and update information  
18 security standards, and require CII institutions to comply with such standards, as it  
19 deems it necessary and appropriate.

20           Nothing in this Act shall prevent a government agency or a sector regulator  
21 from imposing additional or more stringent information security standards for  
22 compliance by industry players under its jurisdiction, as it deems necessary.

23           Sec. 6. National Computer Emergency Response Team ("NCERT") as the  
24 Centralized Information Security Incident Reporting Mechanism. – All covered CII  
25 Institutions shall:

- 26           a. report all information security incidents affecting their institutions to the  
27           DICT's Philippine National Computer Emergency Response Team, which  
28           shall be the central authority for all Sectoral and Organizational CERTs in  
29           the country;  
30           b. submit an information security incident *detection* report to the NCERT  
31           within twenty-four (24) hours upon detection of the incident(s). The report  
32           shall contain basic information about the incident, such as: (1) date when

1 the incident was first detected, (ii) nature of the information security  
2 incident, (iii) possible business processes and functions compromised, and  
3 (iv) agency's initial response and next steps;

4 c. submit an incident *progress* report, upon request of the NCERT, in order  
5 to help assess and provide the necessary support in responding to an  
6 incident;

7 d. submit a *post-incident* report, which contains the following information: (i)  
8 magnitude of business operations compromised, (ii) risk assessment, and  
9 (iii) the agency's response. They shall also provide the necessary  
10 additional information about the incident, as requested by the NCERT;

11 e. compile on an annual basis a summary of all information security incident  
12 reports and submit an annual report to the DICT Cybersecurity Bureau  
13 every 30<sup>th</sup> of June;

14 f. comply with the reporting mechanism and template prescribed by the  
15 DICT, in the submission of all the reporting requirements described above:  
16 *Provided*, that information-sharing shall be done using established  
17 communication protocol, using at the minimum, the Traffic Light Protocol  
18 (TLP) as established by the DICT MC 2017-005 or succeeding policies.

19 g. participate in activities that help promote awareness, capacity building,  
20 and improve an organization's information security readiness, protection,  
21 and incident response capabilities, such as but not limited to cyber drills.

22 Sec. 7. Designation of Personnel with Information Security Credentials. – All  
23 government agencies shall have at least one personnel with sufficient information  
24 security training and credentials. Such personnel shall, preferably, hold at least  
25 Division Chief plantilla position (or equivalent) and perform decision making or  
26 management functions. The DICT shall identify and release a list of credentials that  
27 meet this requirement. Such personnel shall be the point person for (i) compliance  
28 with prescribed standards, (ii) building information security capability within the  
29 agency, and (iii) compliance with the agency's and NCERT's reporting requirements.

30 Section 8. Compliance by all covered CII Institutions.

31 a. Government compliance: The Department of Budget and Management  
32 (DBM) shall review the submission by a CII Institution to the DICT of a

1 formal certification or self-declaration of compliance with any of the  
2 prescribed information security standards, whichever submission applies,  
3 as a prerequisite to budgetary approval. A government institution or sector  
4 regulator, which itself operates or has jurisdiction over CII, shall comply  
5 with the requirements set forth in this Act.

- 6 b. Non-government or private company compliance: Compliance with this  
7 Act, specifically of Sections 5 (standards) and 6 (reporting), shall be a  
8 prerequisite for the granting of any regulatory approval, permit, and/or  
9 license to a private company covered under Section 4 of this Act.

10 Sec. 9. Implementing Agency. – The DICT, through its Cybersecurity Bureau,  
11 shall be the implementing agency of this Act, in accordance with the National  
12 Cybersecurity Plan and relevant DICT policies. The DICT shall:

- 13 a. create and maintain a database of all certifications, self-declaration, and  
14 attestations of all covered CII institutions;
- 15 b. prescribe minimum information security standards for compliance by all  
16 CII institutions;
- 17 c. serve as the custodian for information security standards and incident  
18 reports;
- 19 d. collect and analyze all pertinent information about an information security  
20 incident, and provide to government institutions, sectoral CERTs, and to  
21 the public a technical report of information security incidents for purposes  
22 of policy, regulation, and providing guidance to all stakeholders on local  
23 information security issues.
- 24 e. prescribe a mechanism and template for the reporting of information  
25 security incidents to the NCERT; and
- 26 f. institute a consultation process and hold consultations to update the  
27 coverage and definition of CII, minimum information security standards,  
28 and recognize individual information security certifications every three (3)  
29 years from the effectivity of this Act.

30 Sec. 10. – Responsibilities of the Department Heads and Sector Regulators  
31 with jurisdiction over CII Institutions. The heads of departments and sector  
32 regulators who have a mandate over covered CII Institutions, including Sectoral

1 CERT Leads as identified in DICT DC 003-2020, in coordination with the DICT, shall  
2 be responsible for issuing the necessary policy and regulation that promote  
3 information security and require compliance of CII institutions to the prevailing  
4 standards to ensure information security and business continuity.

5 Sec. 11. Administrative Liability. – The respective heads of departments,  
6 agencies, bureaus, offices, GOCCs, GFIs, and SUCs shall be administratively liable for  
7 non-compliance with this Act pursuant to existing laws, rules, and regulations.

8 Sec. 12. Funding. – The initial funding requirements for the implementation of  
9 this Act shall be charged against the existing budget of the covered CII institutions  
10 and such other appropriate funding sources as the DBM may identify, subject to  
11 relevant laws, rules, and regulations.

12 Sec. 13. Penalty. – Non-compliance with the provisions of this Act, whether or  
13 not it results in data loss, breaches, hacking, or similar incidents, may result in  
14 administrative, civil, or criminal liability under applicable laws, including but not  
15 limited to Republic Act No. 10175 also known as the Cybercrime Prevention Act of  
16 2012 and Republic Act No. 10173 or the Data Privacy Act of 2012.

17 Sec. 14. Annual Report. – Every 30<sup>th</sup> of April of every year, the DICT shall  
18 report to the Office of the President the status of the implementation of this Act.

19 Sec. 15. Separability Clause. – If any provision of this Act is declared invalid  
20 or unconstitutional, the remaining provisions not affected thereby shall continue to  
21 be in full force and effect.

22 Sec. 16. Repealing Clause. – All laws, rules, and regulations inconsistent with  
23 this Act are hereby repealed or modified accordingly.

24 Sec. 17. Effectivity. – This Act shall take effect fifteen (15) days following the  
25 completion of its publication in two (2) newspapers of general circulation.

Approved,
