AN ACT
CREATING THE PHILIPPINE RISE DEVELOPMENT AUTHORITY, DEFINING
ITS POWERS AND FUNCTIONS, PROVIDING FUNDS THEREFOR, AND FOR
OTHER PURPOSES

EXPLANATORY NOTE

Article II, Section 7 of the 1987 Constitution provides that, "*the State shall pursue an Independent foreign policy. In its relations with other states, the paramount consideration shall be national sovereignty, territorial Integrity, national interest, and the right to self-determination.*" Further, Article XII, Section 2 mandates that, "*the State shall protect the nation's marine wealth in its archipelagic waters, territorial sea, and exclusive economic zone, and reserve its use and enjoyment exclusively to Filipino citizens.*"

The "*Philippine Rise*", formerly known as the "*Benham Rise*," as per Executive Order No. 25, series of 2017, is a twenty-four (24) million hectare undersea feature sea located within the Philippine exclusive economic zone and continental shelf, as well as the outer limits of the continental shelf in accordance with the recommendations of the Commission on the Limits of the Continental Shelf (CLCS) issued in April 2012.

It serves as the "gateway" and is a solution to countries located and near the Pacific region in lessening the challenges paves by long distance travel such as fuel and labor expenses. Its strategic location permits navigation to the Pacific Region and serves as a critical entry point for neighboring countries; thereby an ideal base business.

Further, according to the University of the Philippines - Institute of Maritime Affairs and Law of the Sea Director Jay Batongbacal, the underwater plateau contains untapped natural gas and heavy metals. In addition, the area is rich in manganese deposits which is a vital component of steel production and as an ingredient of fertilizers and ceramics. While, Armed Forces of the Philippines Researcher Rowena Tatad

reported that the Benham Bank, the shallowest part of the plateau, has minerals such as methane hydrate to which Geologist Hobart King anticipates to be a "*next energy game changer*" in the coming years since it stores an immense amount of energy when harnessed. Aside from that, the bank also houses a diverse community of marine life, including various soft and hard corals, algae, sponges, and fish.

Considering its substantial size and the existence of marine, oil, and other natural resources, former President Rodrigo Roa Duterte ordered the conduct of extensive research and exploration to tap and accelerate the sound and sustainable development of the Philippine Rise particularly on its potential to be a tourism destination and possible source of alternative energy and marine resources. He also directed the relevant naval forces to protect the area from external threats.

Therefore, an effective institutional mechanism is imperative to be established to address the need for an integrated approach in the formulation and implementation of various development plans, programs, and projects that will optimize the full potential of the Philippine Rise. Thus, this bill seeks to create the Philippine Rise Resource Development Authority which shall promote, coordinate, and facilitate the active and extensive participation of all sectors to effect the exploration, study, utilization, and development of the Philippine Rise. The Authority shall also be the lead agency to enforce the rights of the State over the area, including the conduct of research and exploration.

Thus, the immediate passage of this bill is earnestly sought.
